A Note from the Founder

Dr. Ashwini Kumar Rath
Founder and CEO, Batoi

Batoi was founded on a simple belief: digital systems must not only work; they must be trusted. Over the years, as cloud, AI, and automation expanded, one gap remained consistent: governance. Batoi is built to solve that - at the system level.

Our Journey (2010 → 2026)

Building systems, not just software

2010

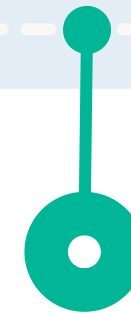

Founded with a focus on enterprise platforms

Development of a RAD framework and modular systems

Transition to platform-first architecture

Today

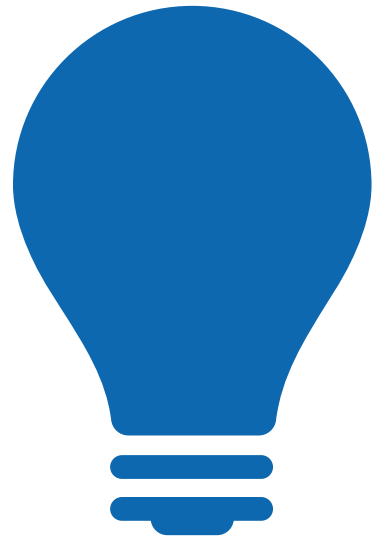

Operating across India, the USA, and the UK

Expansion into cloud, analytics, and architecture engineering

Adoption of DevSecOps and multi-cloud delivery

2024
Unified governed platform launched

What We Learned

Tools do not create governance

Compliance cannot be added later

Security without traceability is incomplete

AI without accountability creates risk

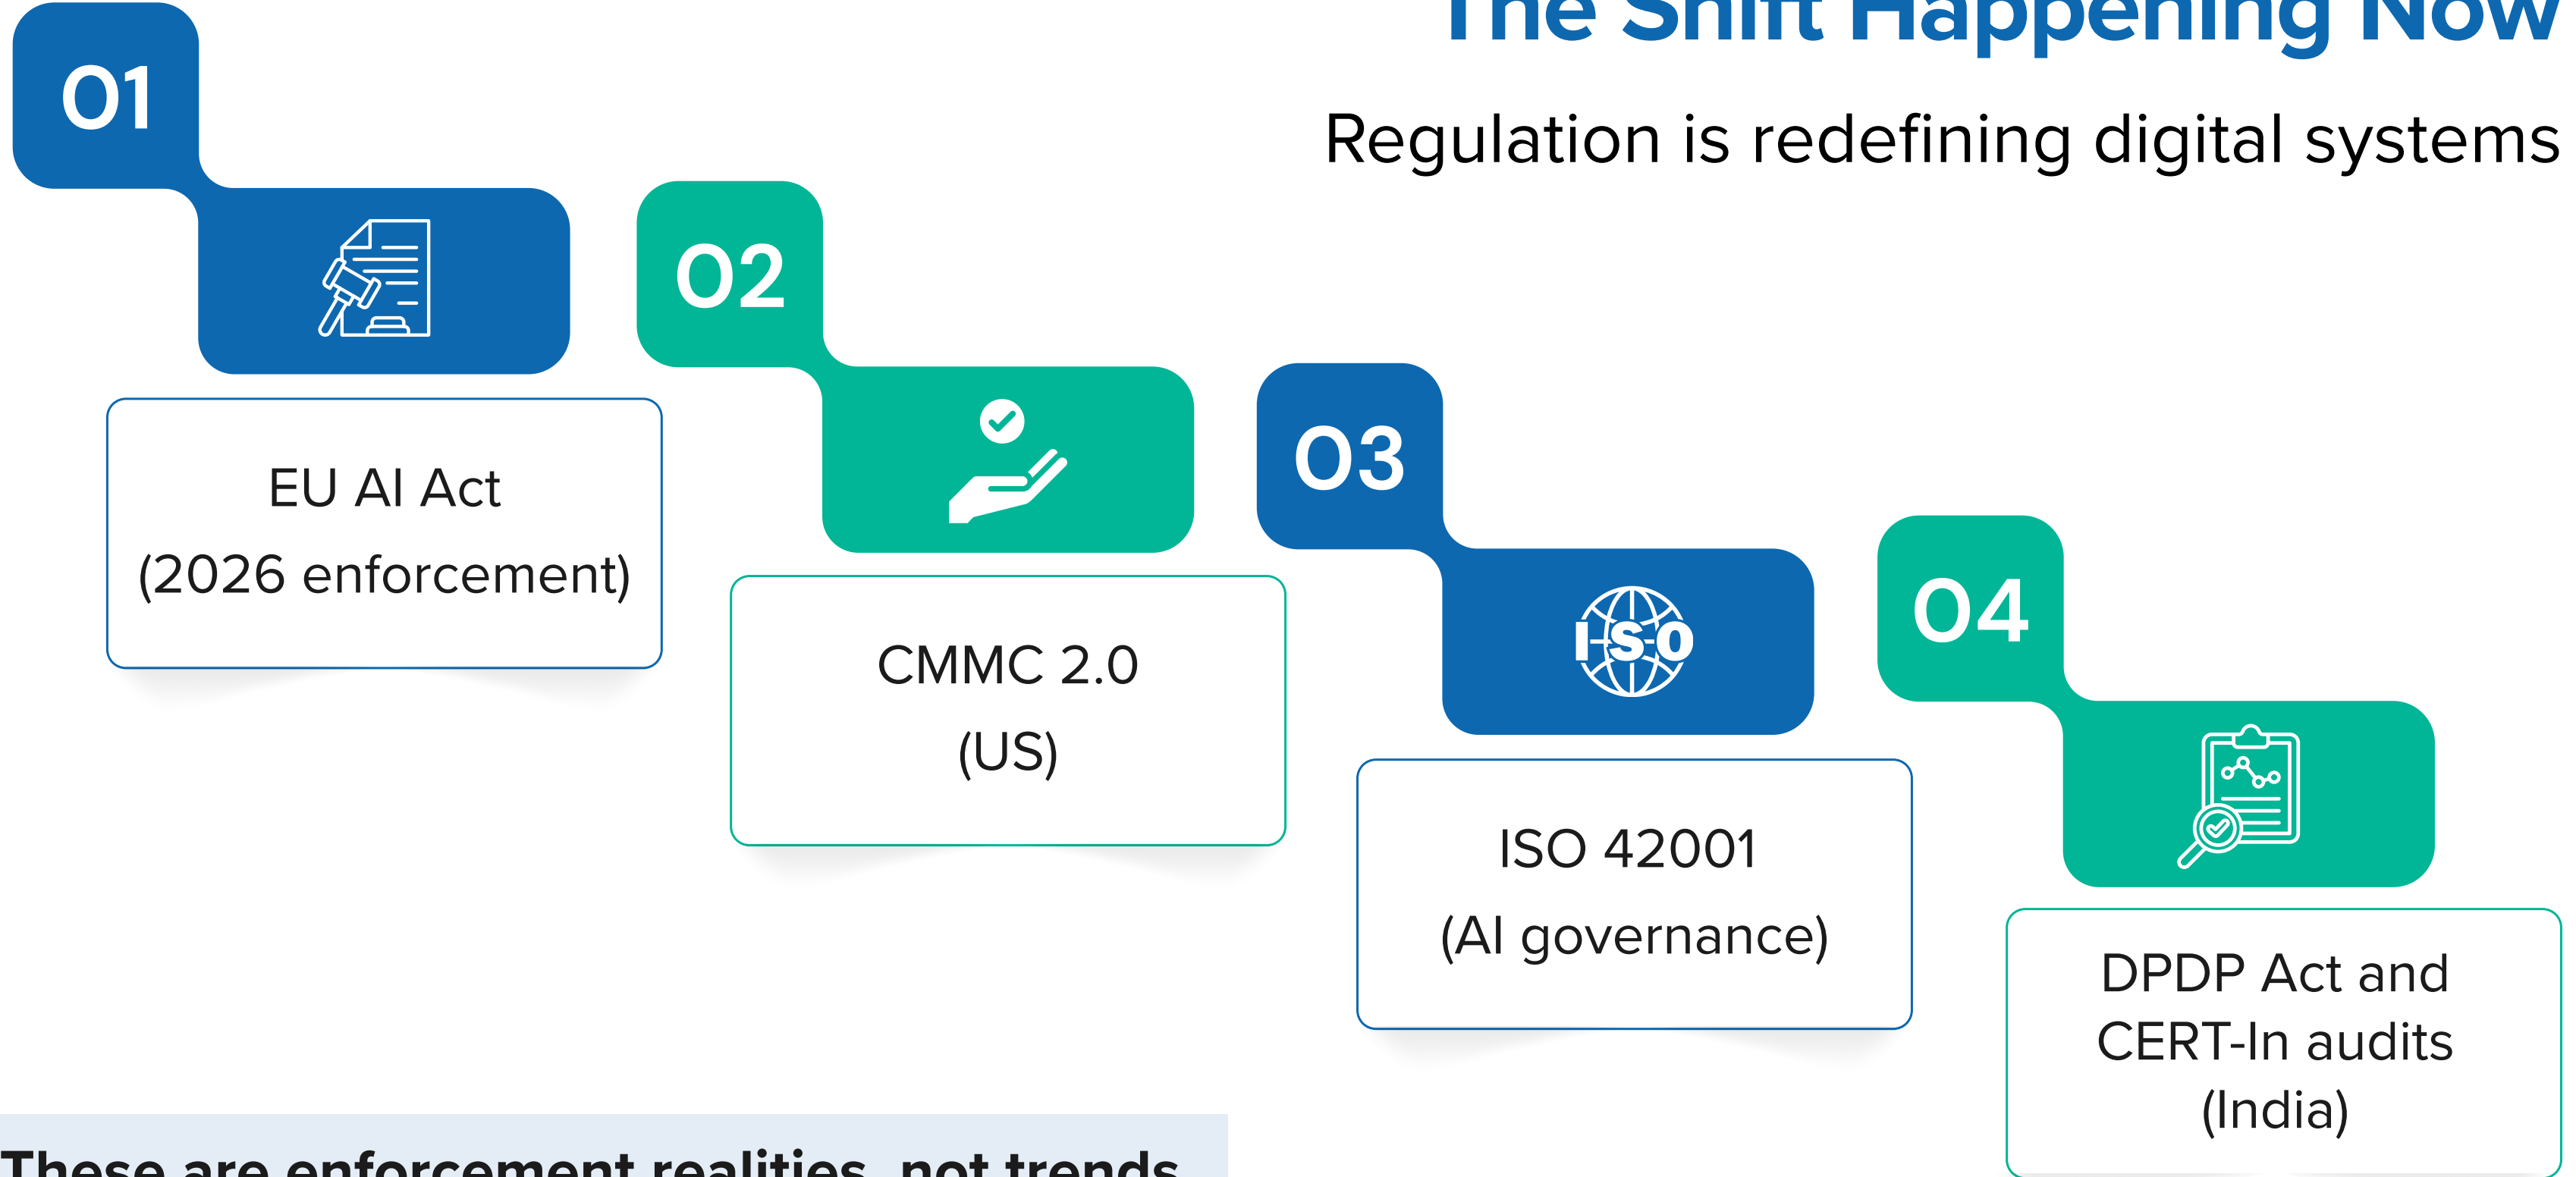

Conclusion

Governance must be built into the system

The Shift Happening Now

Regulation is redefining digital systems

These are enforcement realities, not trends.

The Gap in the Market

Key differences in purchasing experience

What organizations use today

01 One tool for development

02 One for security

03 One for compliance

04 One for collaboration

Result

Fragmentation

Manual audit effort

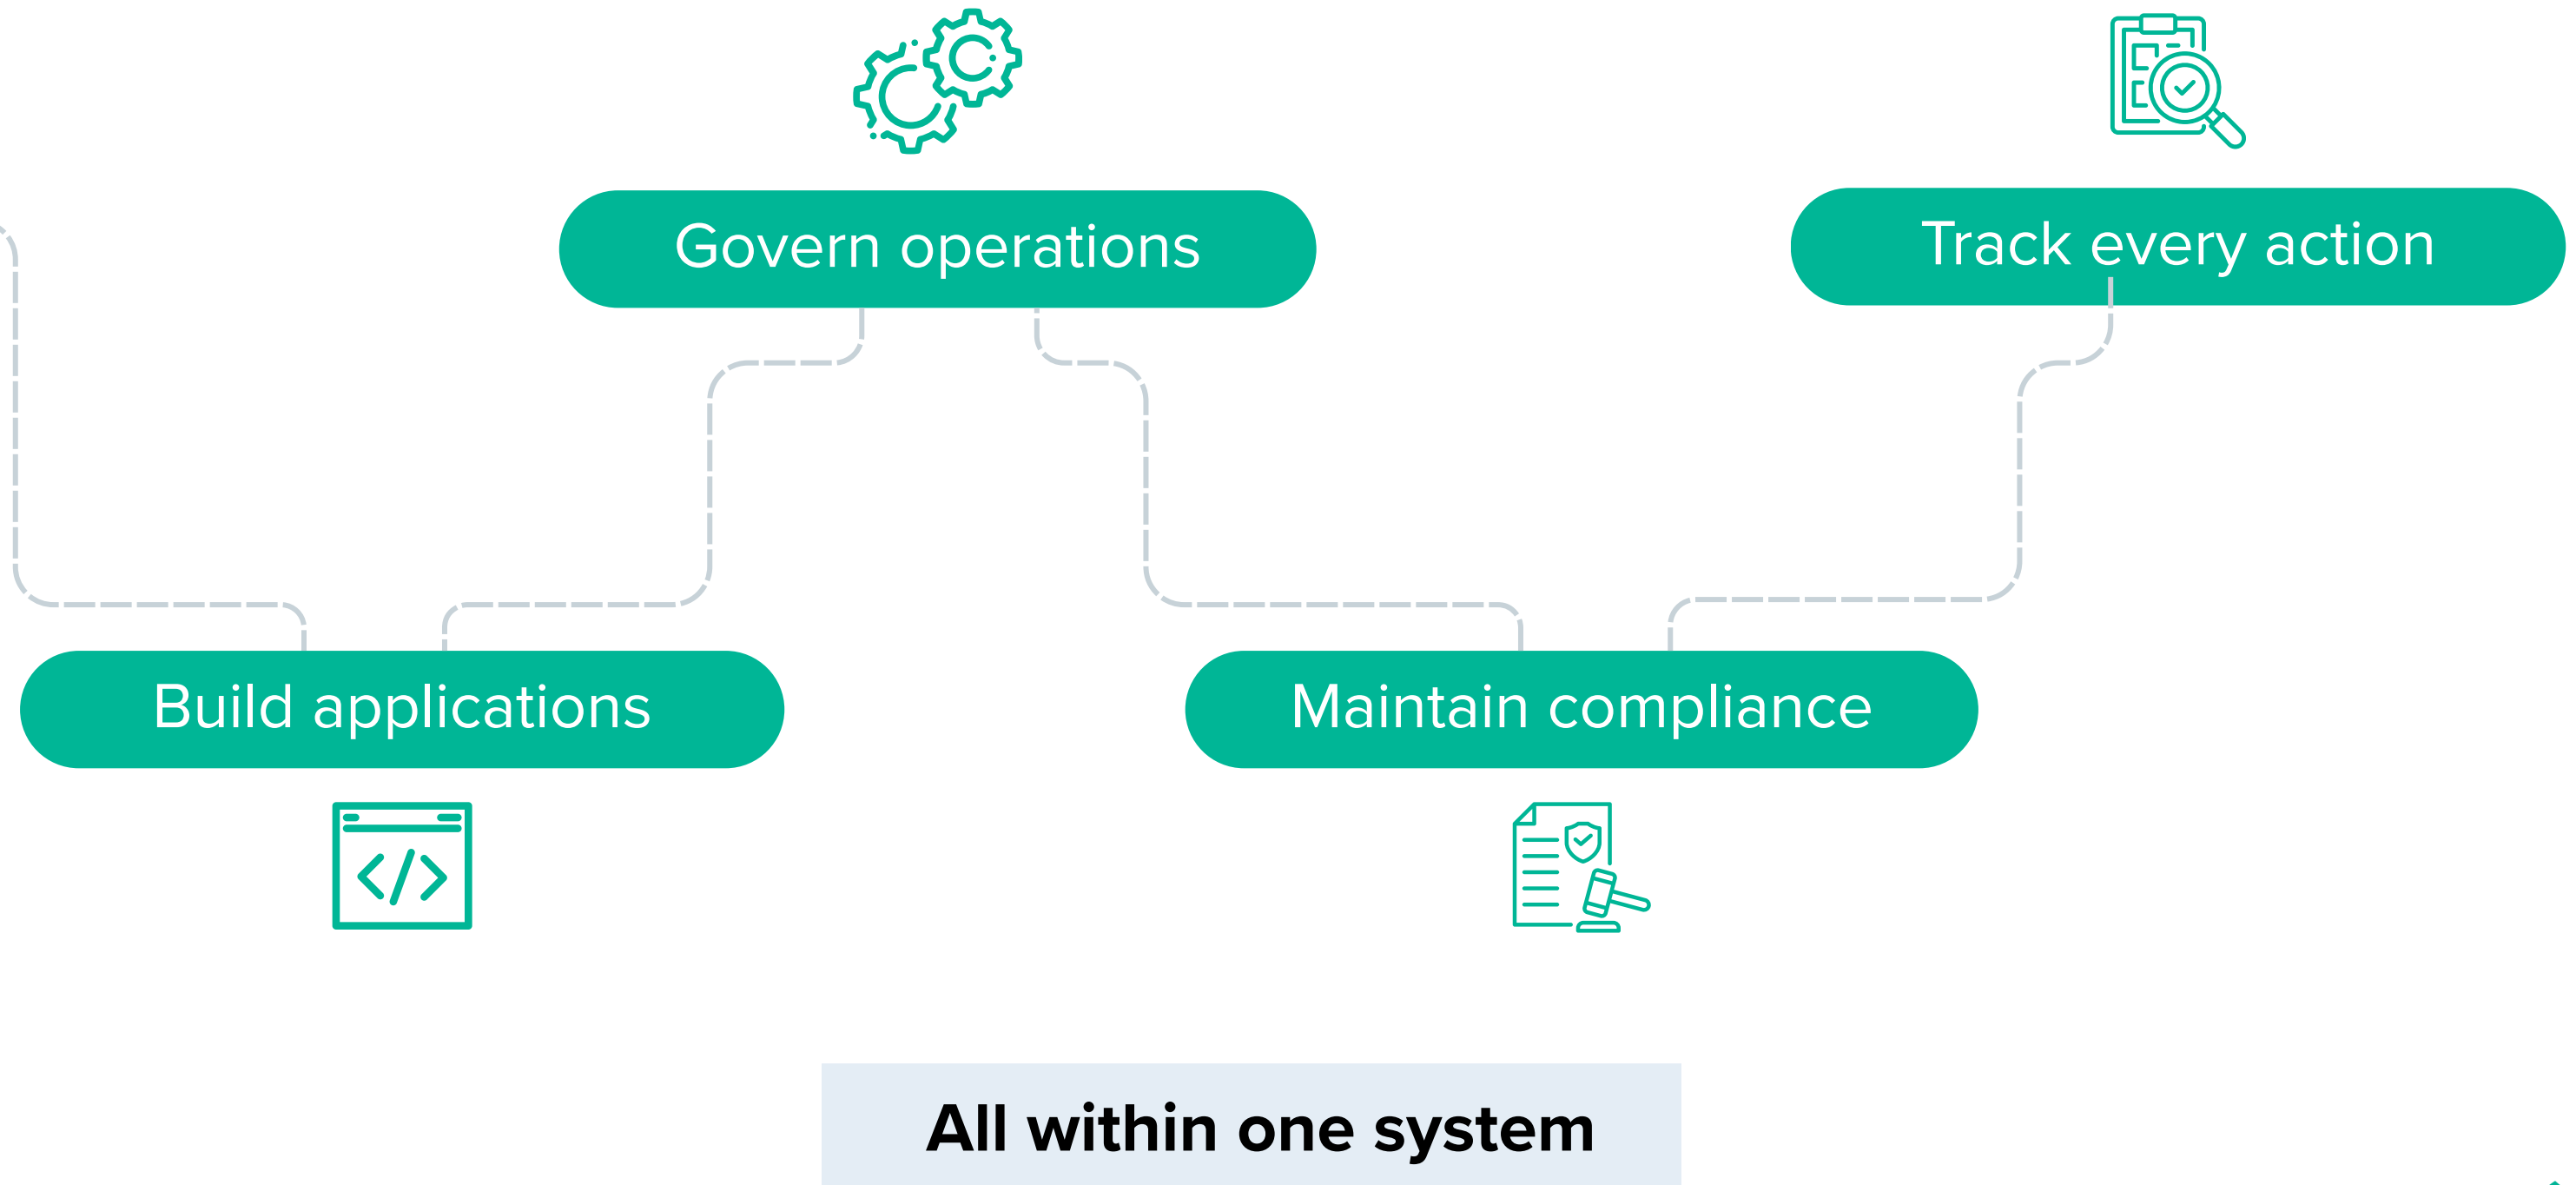

Inconsistent governance

Batoï enables organizations to...

Introducing Batoï

A single governed platform

Platform Philosophy

Governance is built in

Not added later

Not managed externally

Not dependent on integrations

Every action is:

Policy-controlled

Traceable

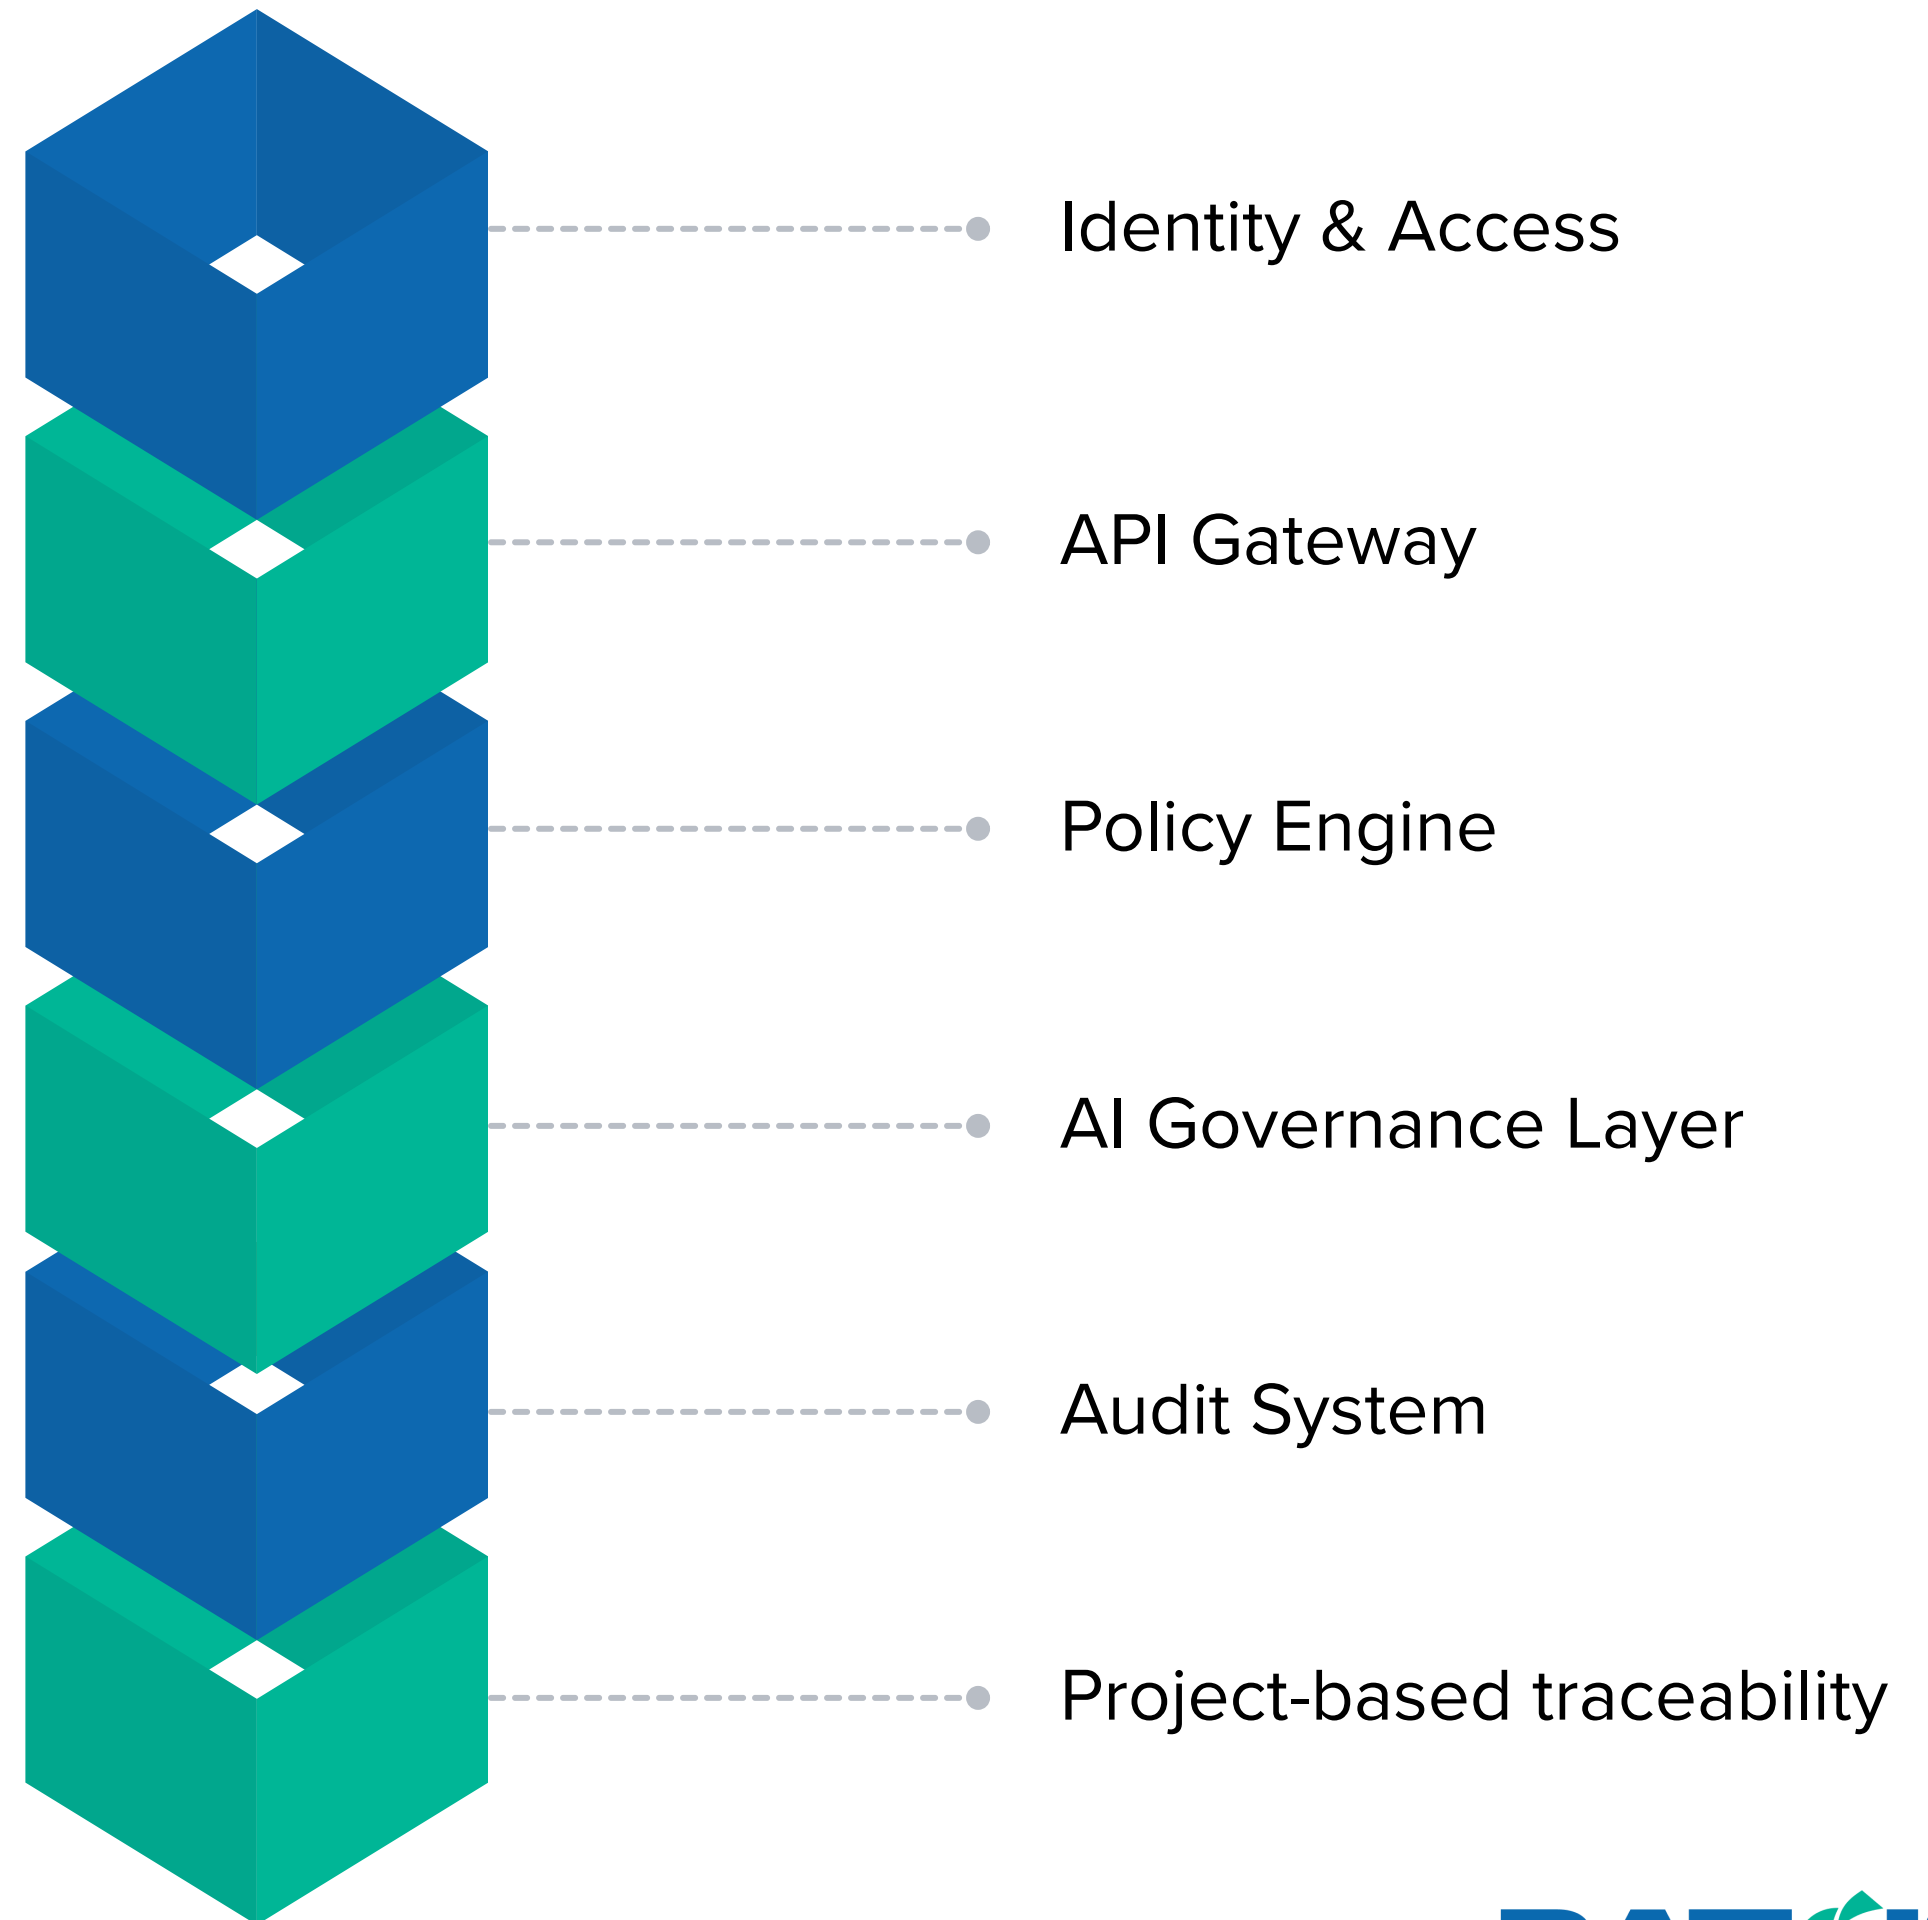

Auditable

Platform Foundation

Batoi Core - powers everything

Foundational across all products

Designed to work together, not in silos

Batoi Govern

Continuous GRC + AI Governance

Multi-framework assessments

Policy enforcement

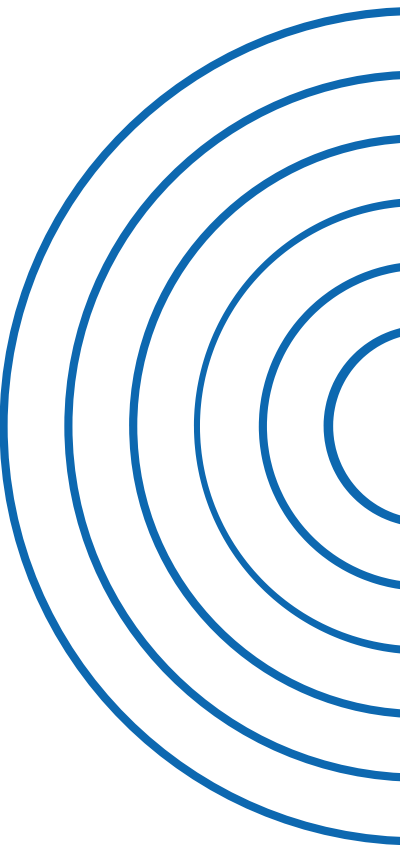

Audit-ready evidence

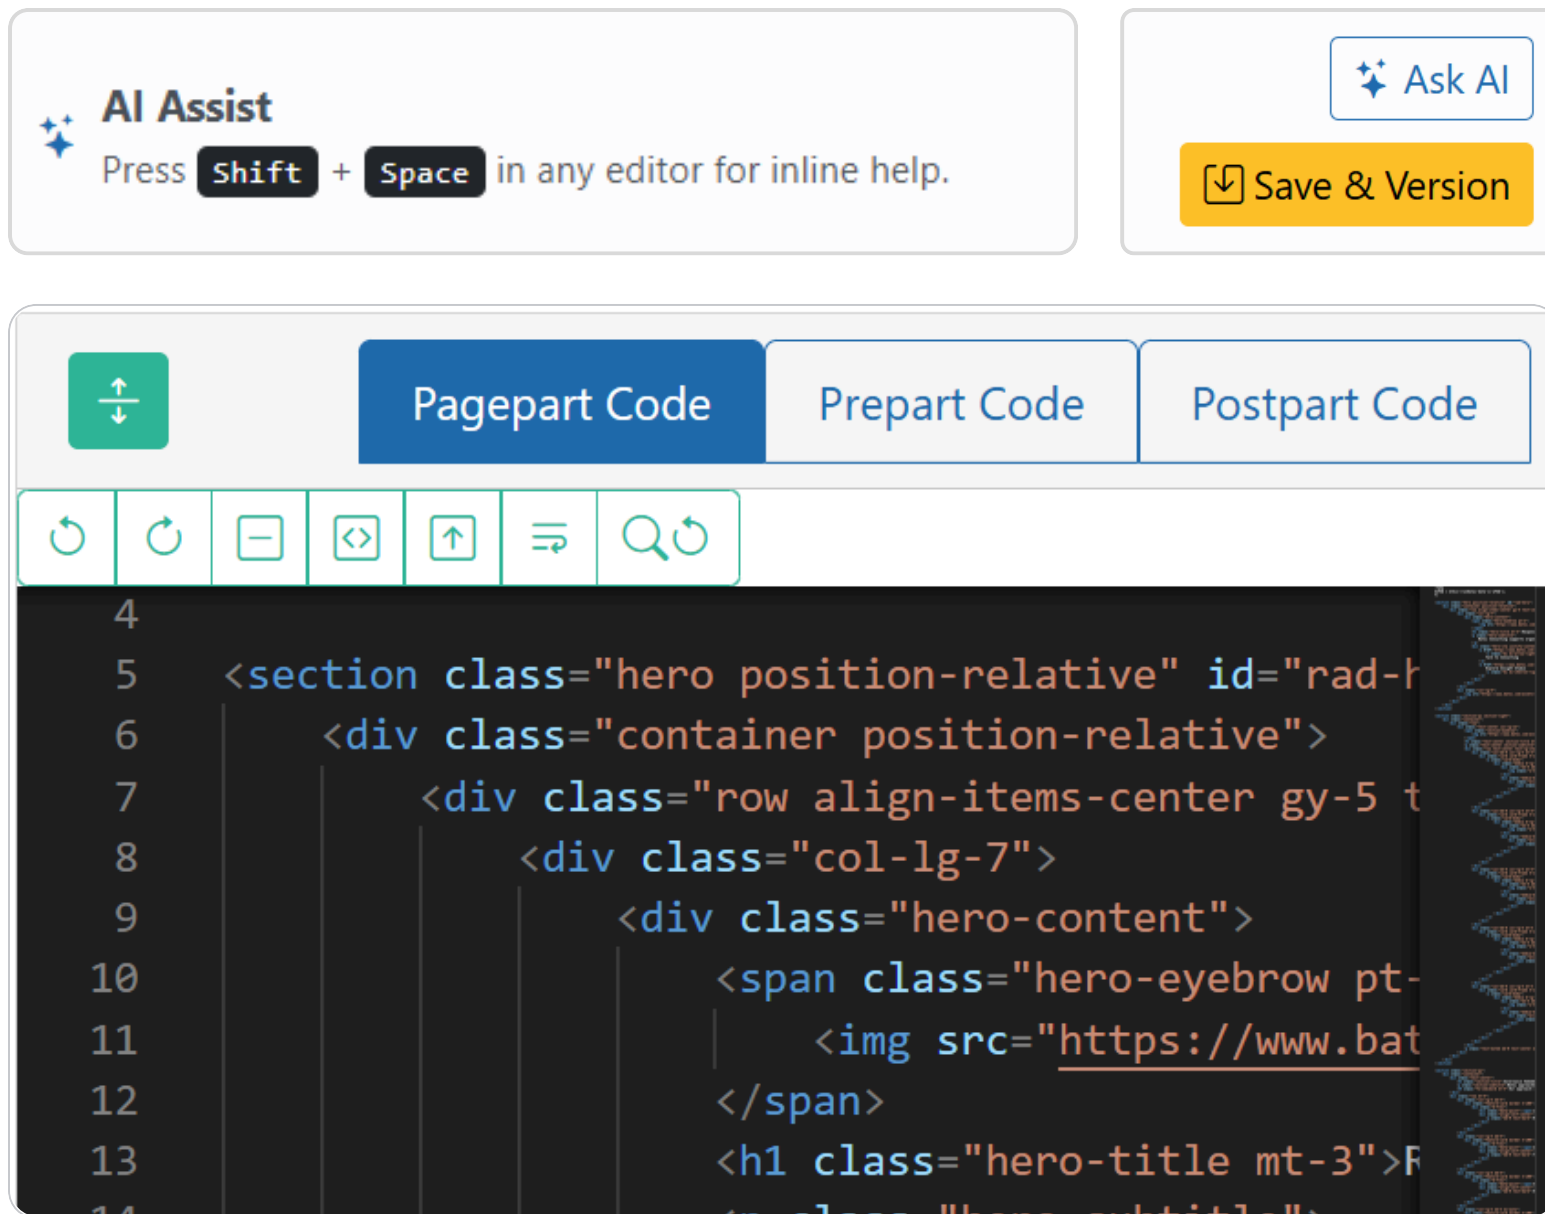

AI risk tracking

Entry point for enterprises

Batoi Build

Governed Application Development

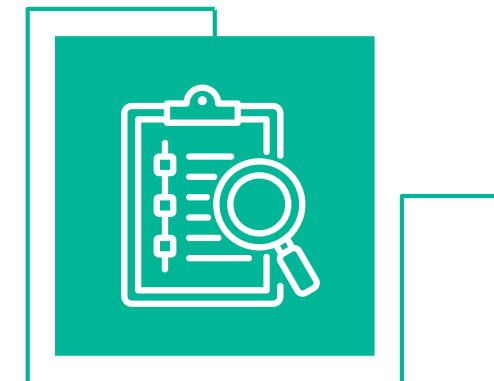

Low-code + pro-code with source code

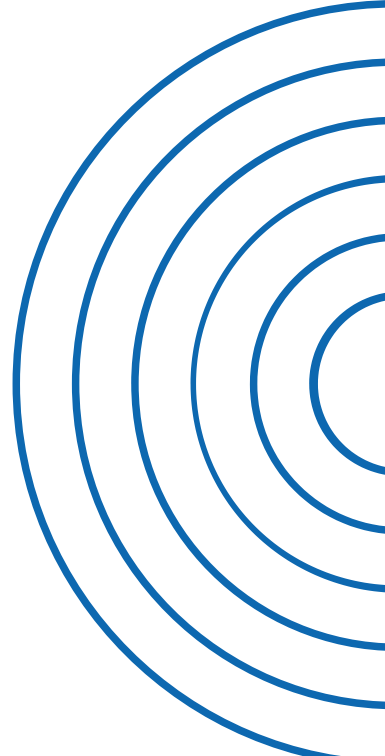

Policy-gated CI/CD

API lifecycle

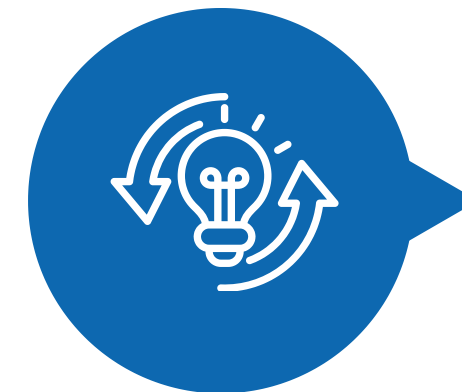

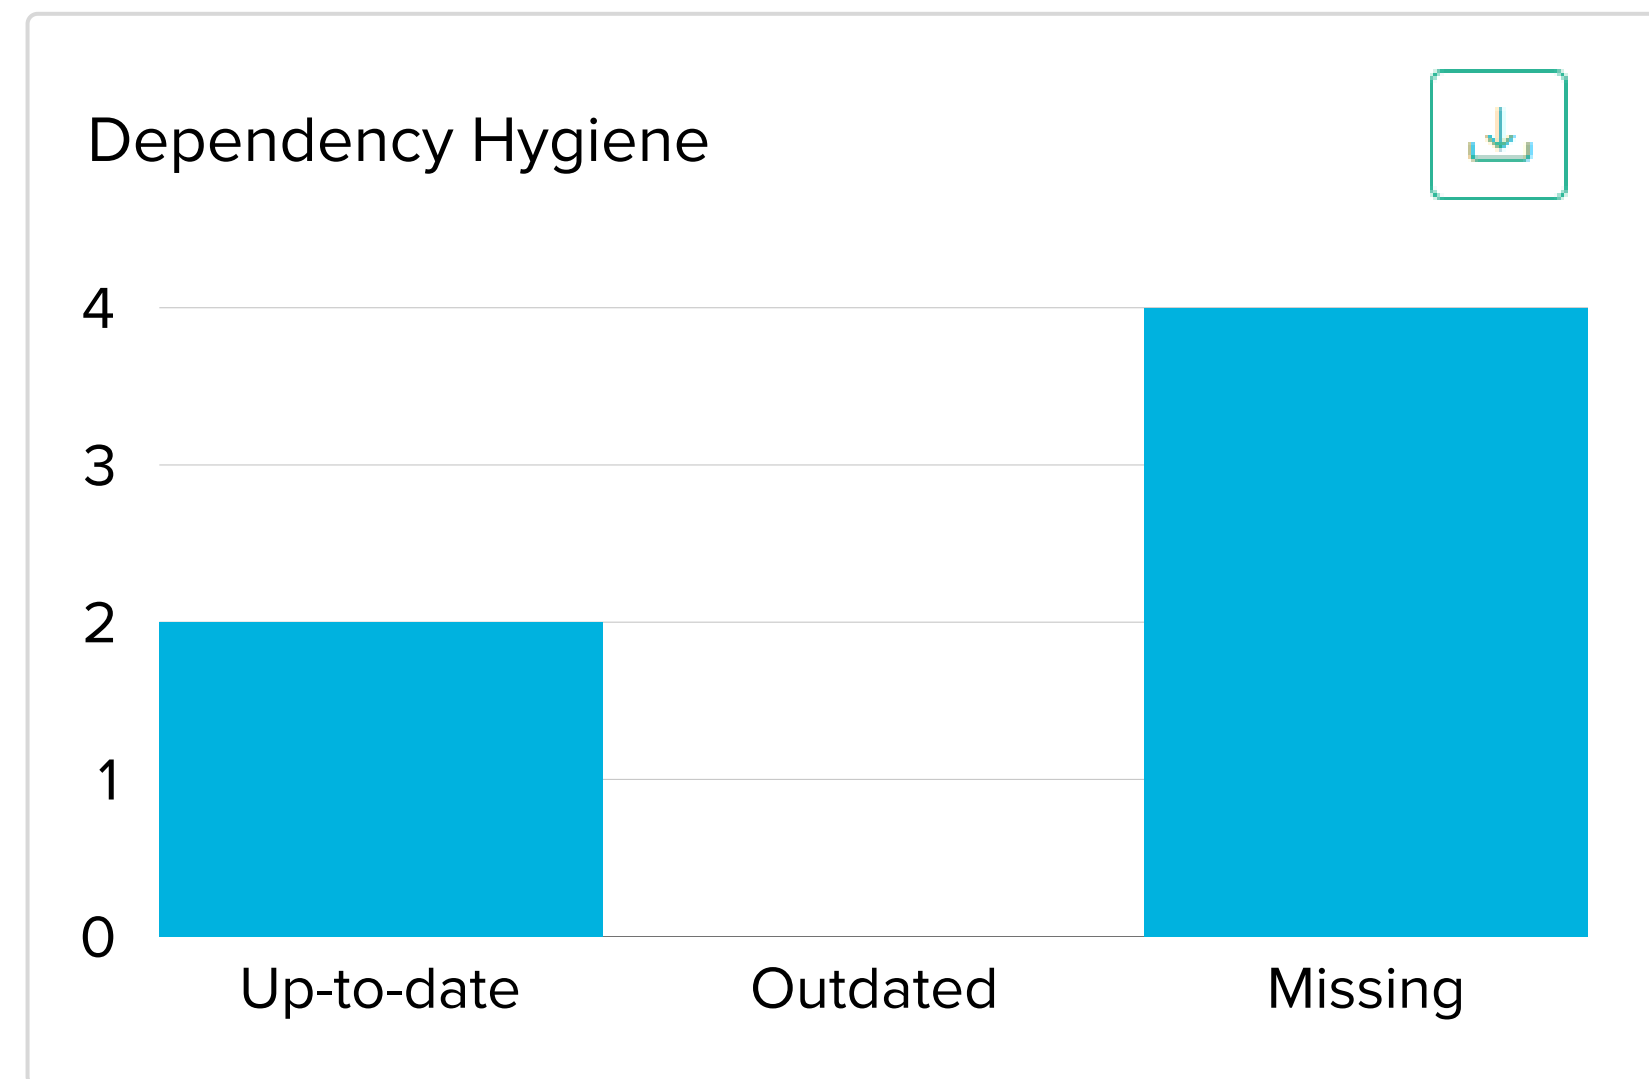

Full traceability

Batoi Guard

DevSecOps + Supply Chain Security

★ Key 2026 product

SBOM generation

Dependency scanning

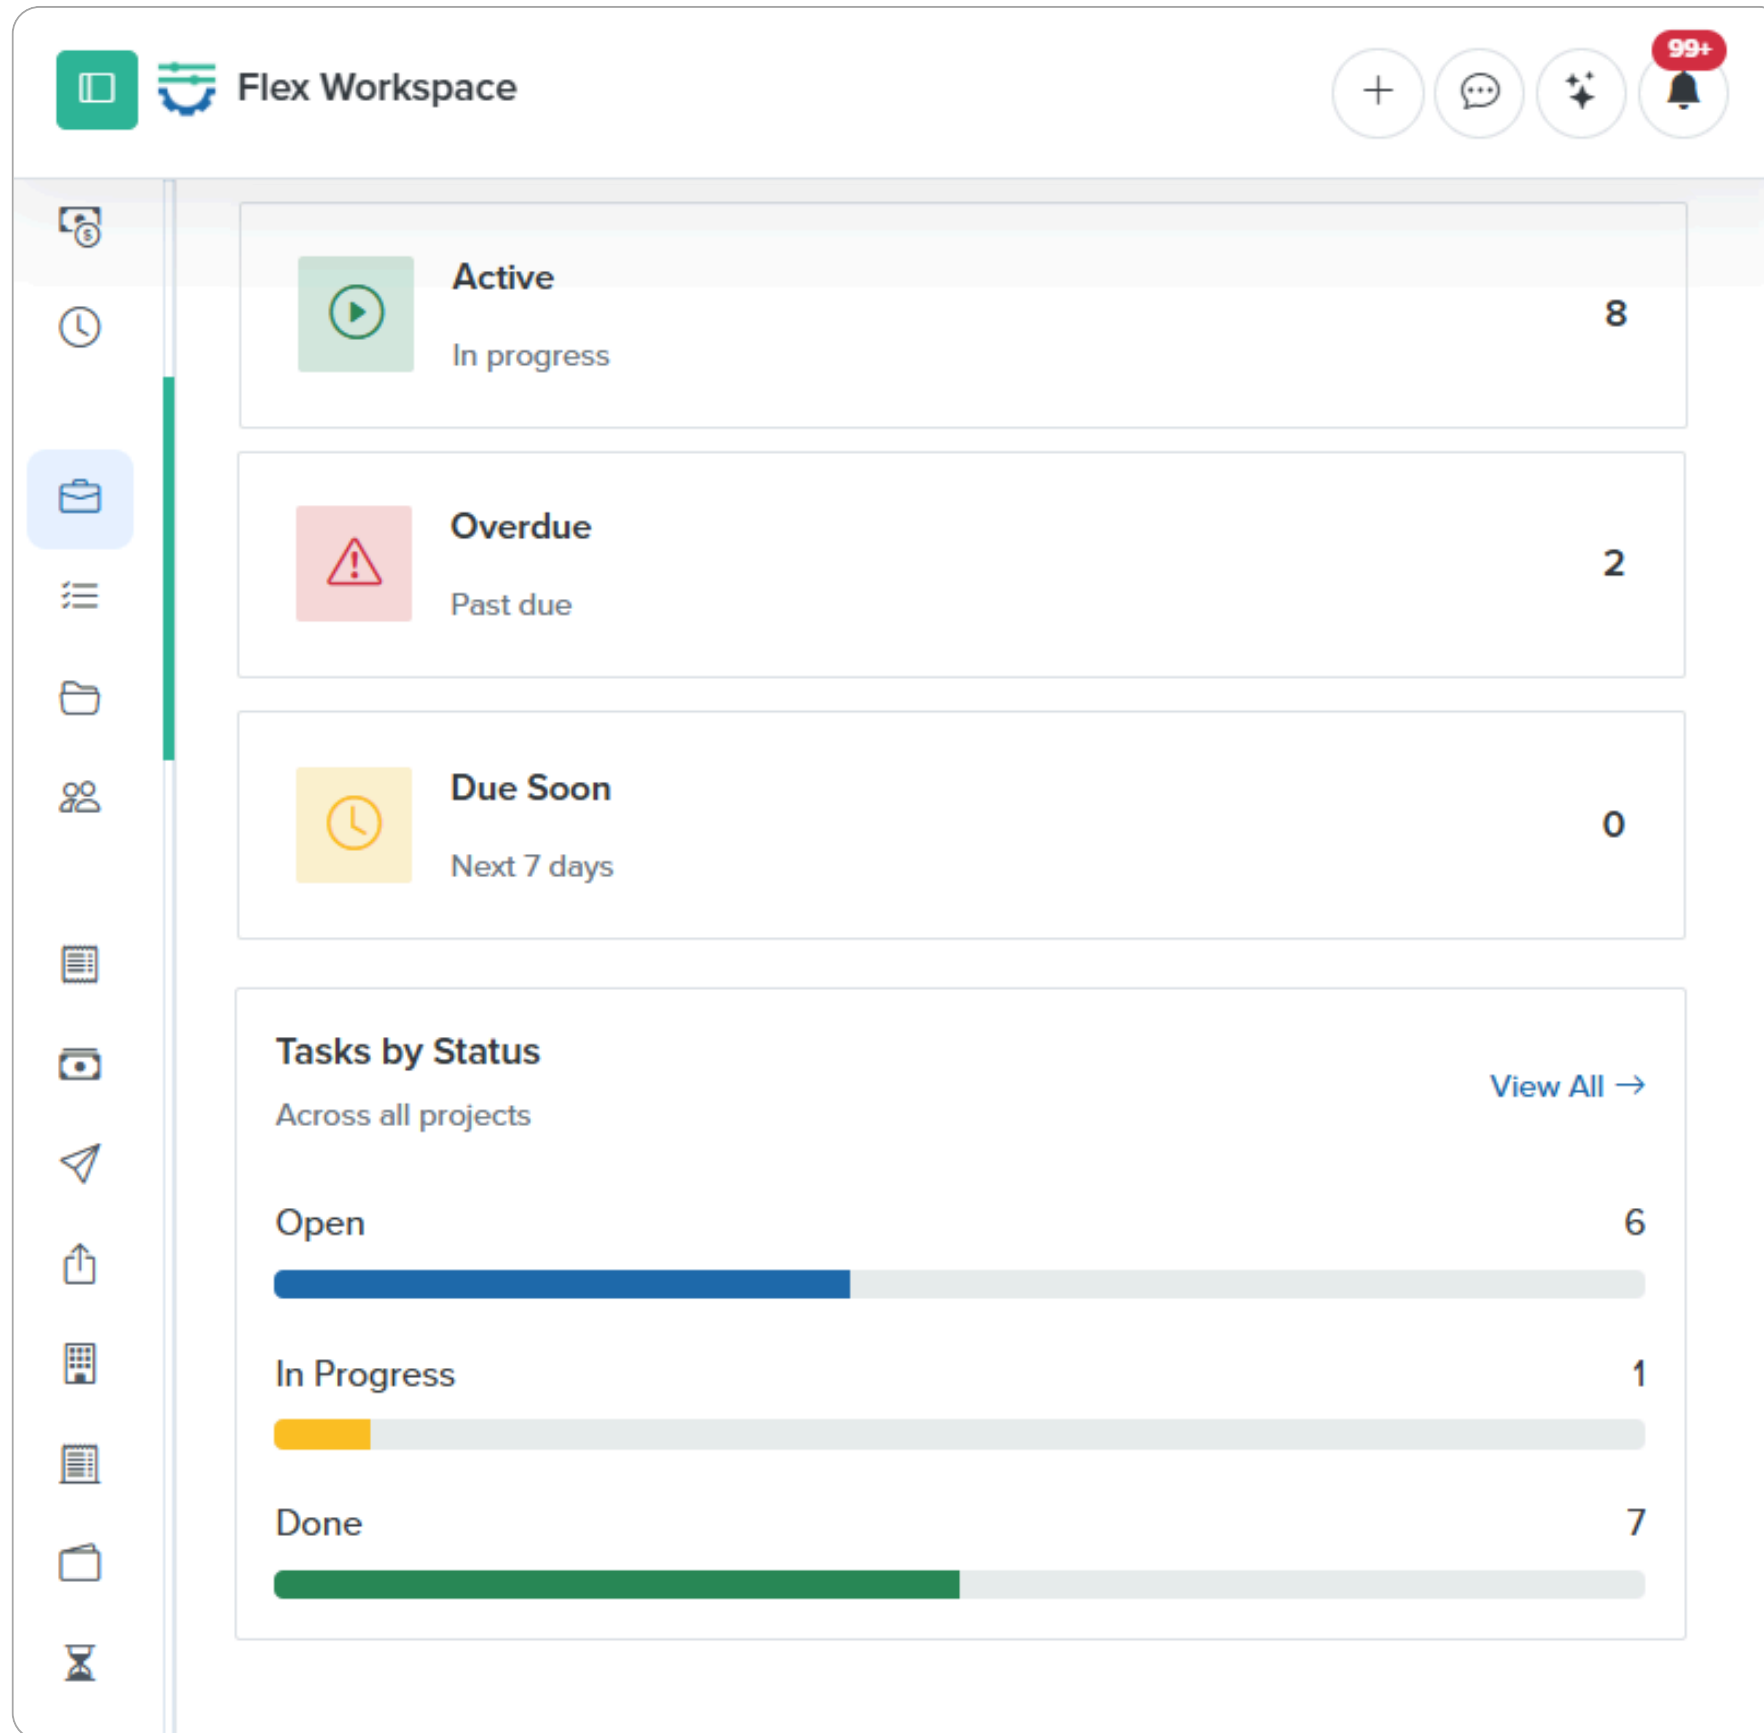

Policy gates

Evidence vault

Batoi Flex

Operations Suite for SMBs

- CRM, Website, invoicing

- AI-driven productivity and analytics

- Security compliant by design

- Support for Industry verticals

Batoi Academy

Learning + Labs + Certifications

01

AI, DevSecOps, Cloud

03

Certifications

02

Digital Tech Labs

04

Institutional partnerships

The Unified Advantage

The Governed Builder

01

Build systems

02

Maintain compliance

03

Prove governance

Batoi supports all three in one workspace

Who We Serve

Audit firms

SMBs

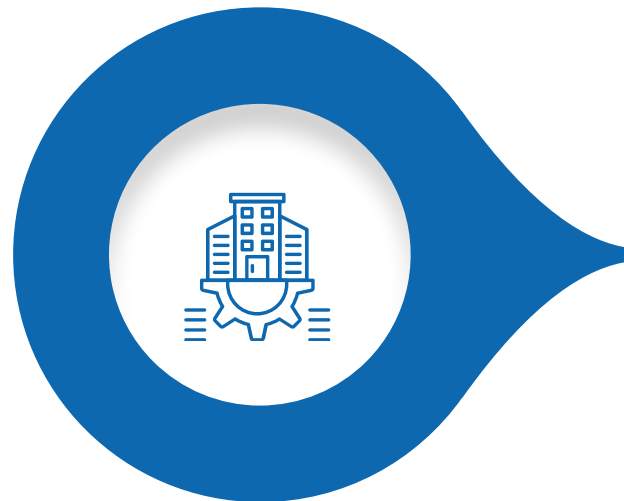

IT service providers

Associations and communities

Enterprises (regulated sectors)

Universities and institutions

Trusted by the Best

Batoi Platform and products are in use by major organizations worldwide.

Our focus on quality and innovation makes us a preferred partner across industries.
