Governed Digital Systems Platform

# Build, govern, and secure your digital systems in one platform.

A new way to build and operate digital systems

Organizations today struggle with fragmented tools for development, security, compliance, and collaboration. Batoi replaces this fragmentation with a single governed platform.

## What Batoi Enables

- Build applications with governance embedded
- Maintain a continuous compliance posture
- Secure software supply chains
- Govern AI systems responsibly
- Produce audit-ready evidence automatically

## Why Now

Global regulatory pressure is accelerating:

- EU AI Act (2026)
- CMMC 2.0 (US)
- ISO 42001 (AI governance)
- DPDP Act and CERT-In audits (India)

Governance is no longer optional

Built into the system

Enforced through policy

### The Batoi Approach - Governance

Captured in audit trails

Linked across all workflows

# Built Over a Decade of Systems Engineering

Founded in 2010 by Dr. Ashwini Kumar Rath

- ✔ Enterprise platform engineering
- ✔ Cloud and DevSecOps adoption
- ✔ Modular architecture and RAD framework
- ✔ Transition to governance-first systems

## Today:

Operating across India, USA, and UK

## Where You Start

- 🔗 Enterprise → Govern
- 🔗 IT / Dev → Build
- 🔗 Security → Guard
- 🔗 SMB → Flex
- 🔗 Institution → Academy

## Partner with Batoi

*Revenue participation, Delivery ownership, and Certification via Academy*

- » Registered Partner
- » Certified Partner
- » Strategic Partner
