

Batoi solutions for

Educational Institutions

Connect the learner journey, institutional operations, digital delivery, and accountable innovation.

FOR SCHOOLS, COLLEGES, UNIVERSITIES, AND TRAINING PROVIDERS

Disconnected systems fragment the learner journey

Fragmentation creates duplicate records, slow handoffs, inconsistent access, and weak evidence.

01

Admissions

Enquiries, applications, documents, enrollment

02

Academic delivery

Programmes, cohorts, sessions, attendance

03

Assessment

Assignments, grading, results, progression

04

Administration

Fees, communication, records, reporting

05

Digital delivery

New apps, integrations, AI and digital services

The objective is not another isolated tool.

It is one governed operating context that connects people, learning, work, decisions, and evidence.

One connected Batoi approach, with clear roles

Operational workflows, governed delivery, capability development, and education remain connected but distinct.

Batoi Flex

Education Industry Pack

Coordinate applications, enrollment, programmes, cohorts, teaching, assessment, records, and fees in one operational workspace.

Batoi Platform

Governed digital delivery

Build and integrate institutional apps and workflows with shared identity, policy, security gates, deployment controls, and evidence.

Batoi Learn + Batoi Academy

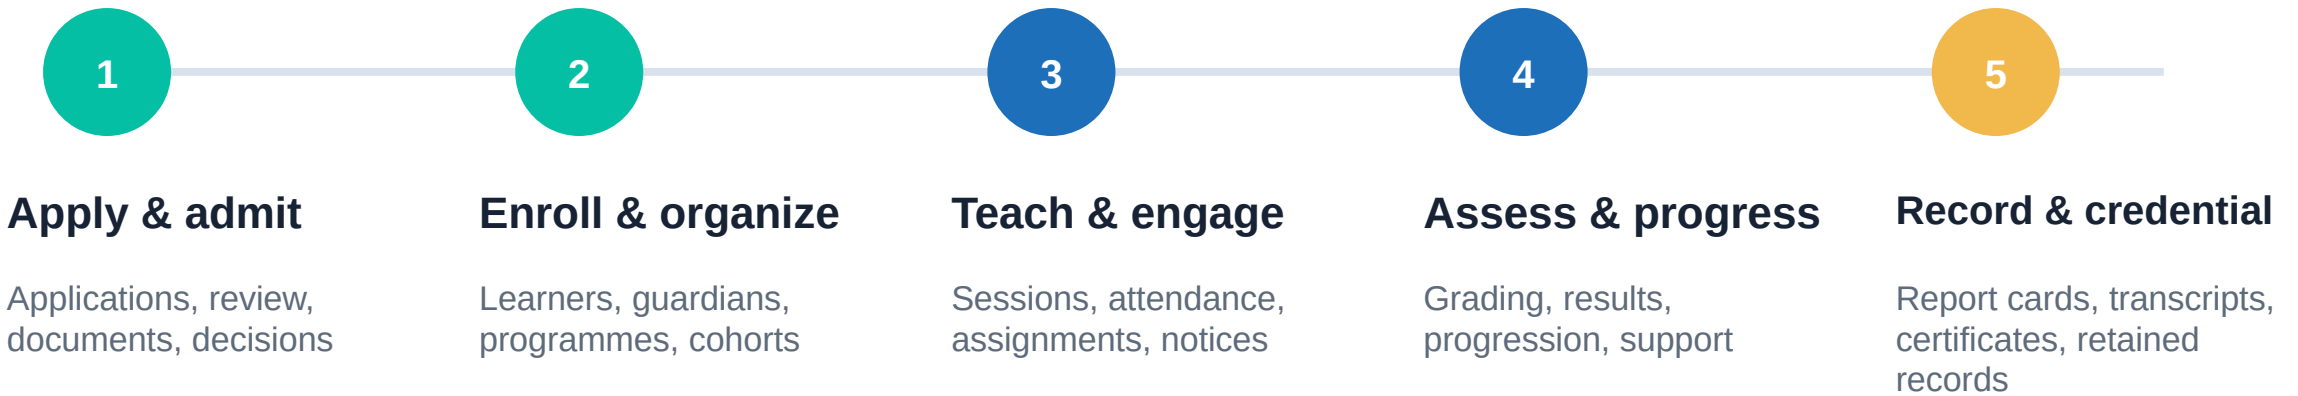

Platform capability + education function

Batoi Learn - guided Labs, assessment, reflection, mastery, and reviewed application inside Platform.
Batoi Academy - curricula, fellowships, university engagement, research translation, and public-interest education.

Shared identity • integrations • policy • security • evidence • Batoi Intelligence

Connect the learner lifecycle end to end

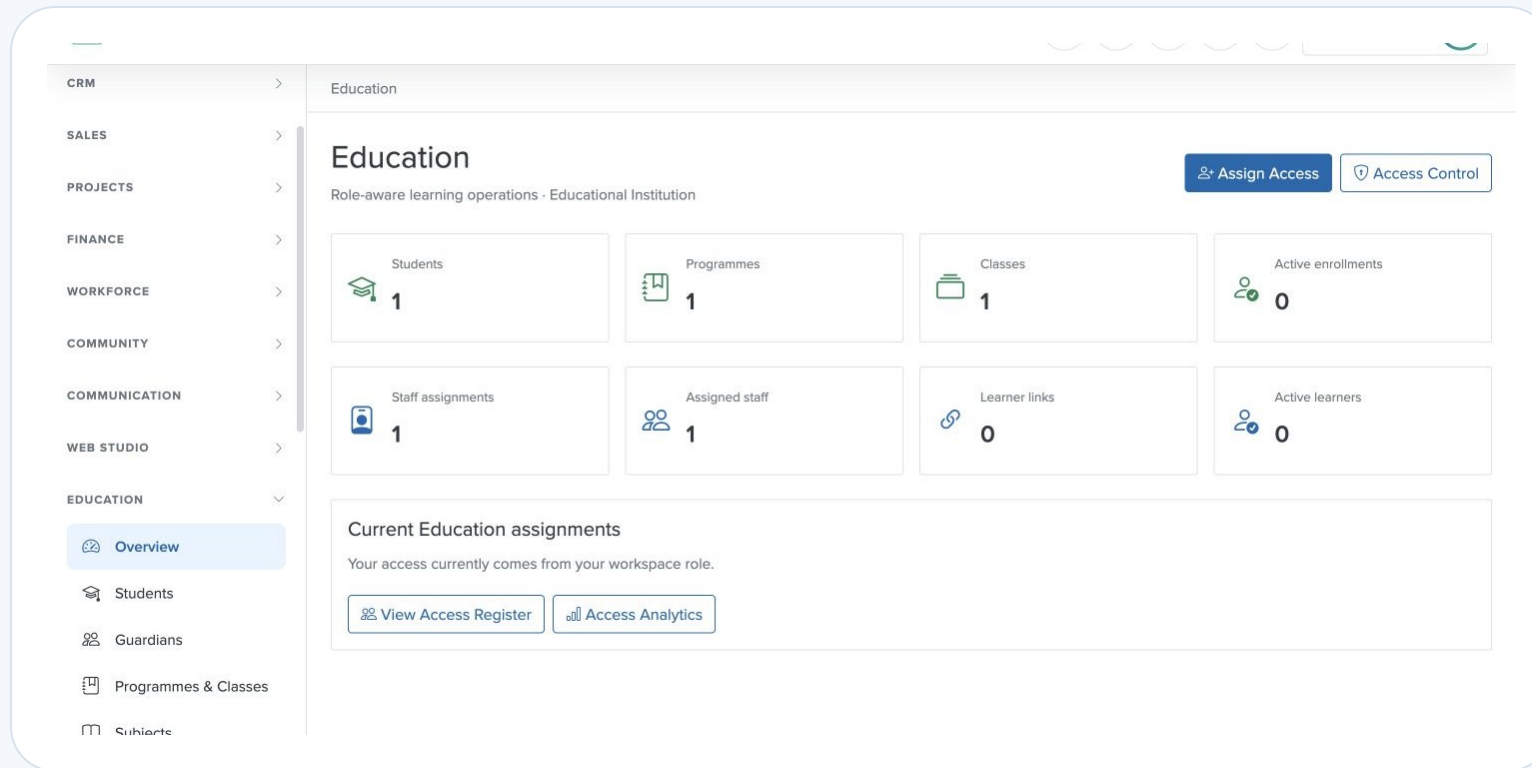

Batoi Flex Education keeps operational handoffs and records connected across departments.

Role-aware access gives administrators, instructors, learners, and guardians the information and actions relevant to them.

Give every team one operational view

A shared workspace brings records, responsibilities, access, and activity together.

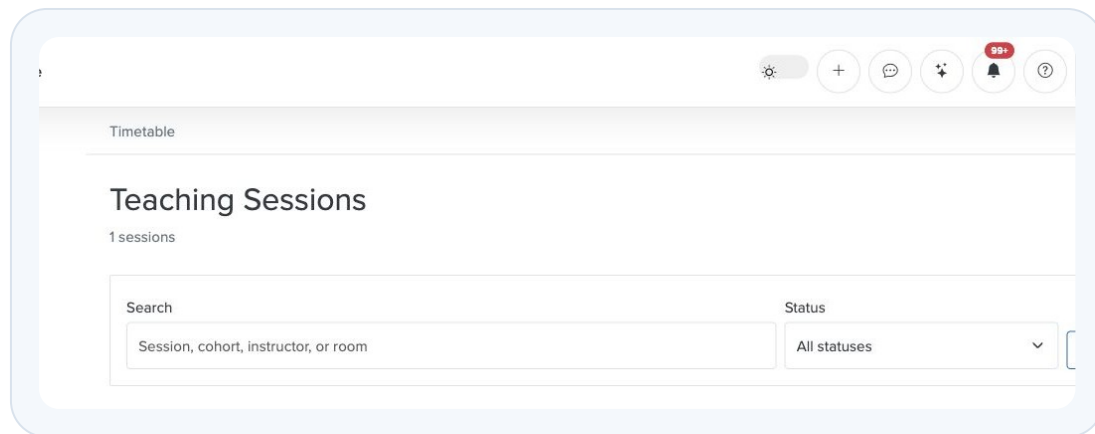

Role-aware by design

- Programme, cohort, class, and learner context
- Staff assignments and access controls
- Learner- and guardian-linked experiences
- Operational registers and analytics
- Related documents and communication

Scope and configuration are confirmed during discovery.

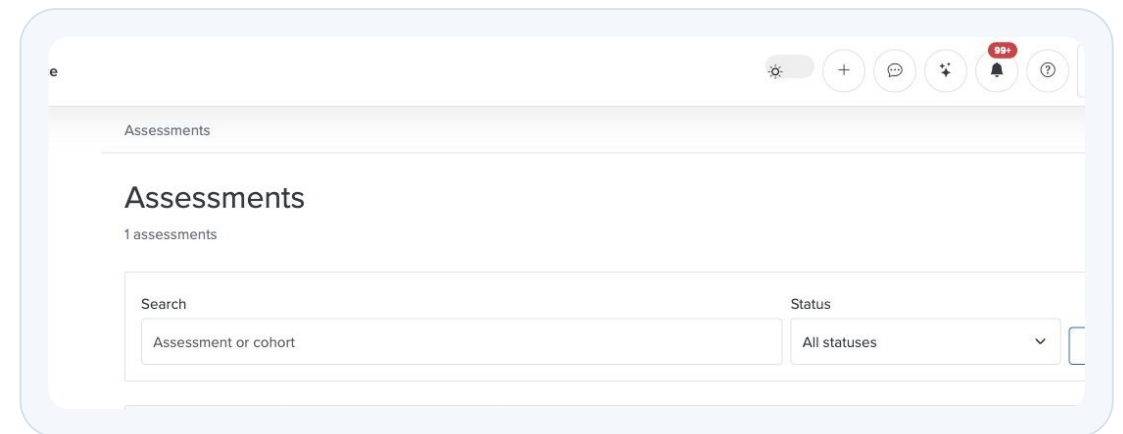

Coordinate teaching, assessment, and progression

Educators can see what is scheduled, what is submitted, and where review or support is needed.

Plan and participate

Sessions, rooms, instructors, timetables, attendance, announcements, assignments, and submissions.

Assess and progress

Assessments, question banks, grading schemes, results, report cards, transcripts, progression, and credentials.

Guided practice builds proven capability

Batoi Learn connects guided Labs, practice, assessment, reflection, and reviewed application.

CRITERION	SCORE	FEEDBACK AND NEXT ACTION
Scope	93%	Evidence meets the current proficiency threshold. Test the remaining assumption in context.
Applicability	88%	Evidence meets the current proficiency threshold. Test the remaining assumption in context.
Inherent Risk	77%	Evidence meets the current proficiency threshold. Test the remaining assumption in context.
Controls	80%	Evidence meets the current proficiency threshold. Test the remaining assumption in context.
Evidence	86%	Evidence meets the current proficiency threshold. Test the remaining assumption in context.
Residual Risk	91%	Evidence meets the current proficiency threshold. Test the remaining assumption in context.
Reflection	97%	Evidence meets the current proficiency threshold. Test the remaining assumption in context.

1

Learn

Understand the method

2

Try

Build in a safe context

3

Assess

Use criteria and evidence

4

Reflect

Capture insight

5

Apply

Produce reviewed work

For staff development, guided Labs, and reviewed application.

Nine Labs span AI, strategy, and assurance

Choose a Lab for a real institutional decision, then produce reviewable evidence through guided practice.

AI practice

Four guided Labs

AI Adoption Planner
AI Governance & Compliance
Applied ML
AI Response

Strategy

Two guided Labs

SaaS Strategy
Cloud Strategy and Sustainability

Assurance

Three guided Labs

Governance Assurance
Security Assurance
Operations Readiness

Every Lab follows: Learn | Try | Assess | Reflect | Apply

Turn institutional records into accountable action

Dashboards and governed assistance help people ask better questions while decisions remain human-owned.

01

Participation

Attendance, submission,
and engagement signals

02

Progress

Assessment results,
progression, and
completion

03

Operations

Applications, enrollment,
staffing, fees, and
exceptions

04

Assurance

Access, approvals,
activity, evidence, and
readiness

Batoi Intelligence

Ask • Draft • Analyze • Coordinate

Permissions, policy, scope, human review, and usage
evidence remain active across supported workflows.

Make security part of everyday institutional work

Identity, policy, safeguards, and evidence remain connected to the operating context.

Identity & access

Named users, roles, entitlements, workspace boundaries

Policy & approvals

Explicit decisions, exceptions, obligations

Security gates

Findings, remediation, release checks, oversight

Evidence

Activity, decisions, outcomes, reviewable records

Certifications, examination, and assessment.

ISO 9001:2015

ISO/IEC 27001:2022

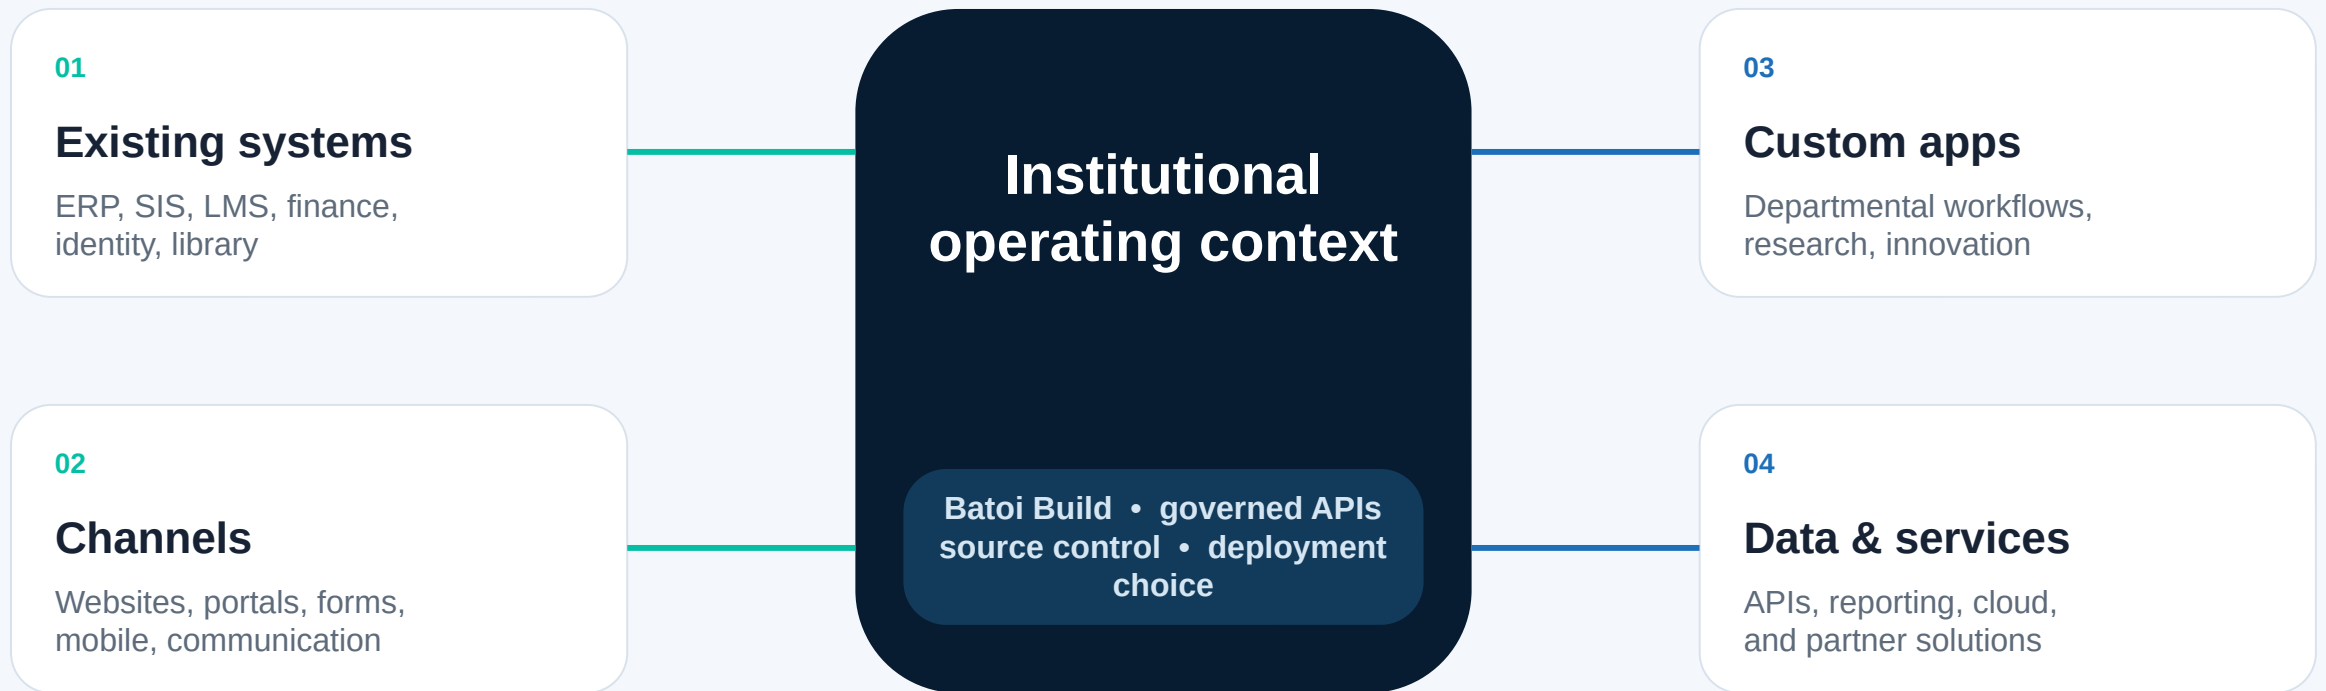

SOC 2 TYPE II

GDPR INDEPENDENT ASSESSMENT

Assurance applies to defined entities, services, systems, periods, and deployment scopes. SOC 2 Type II is an independent examination; GDPR work is an independent assessment and privacy programme.

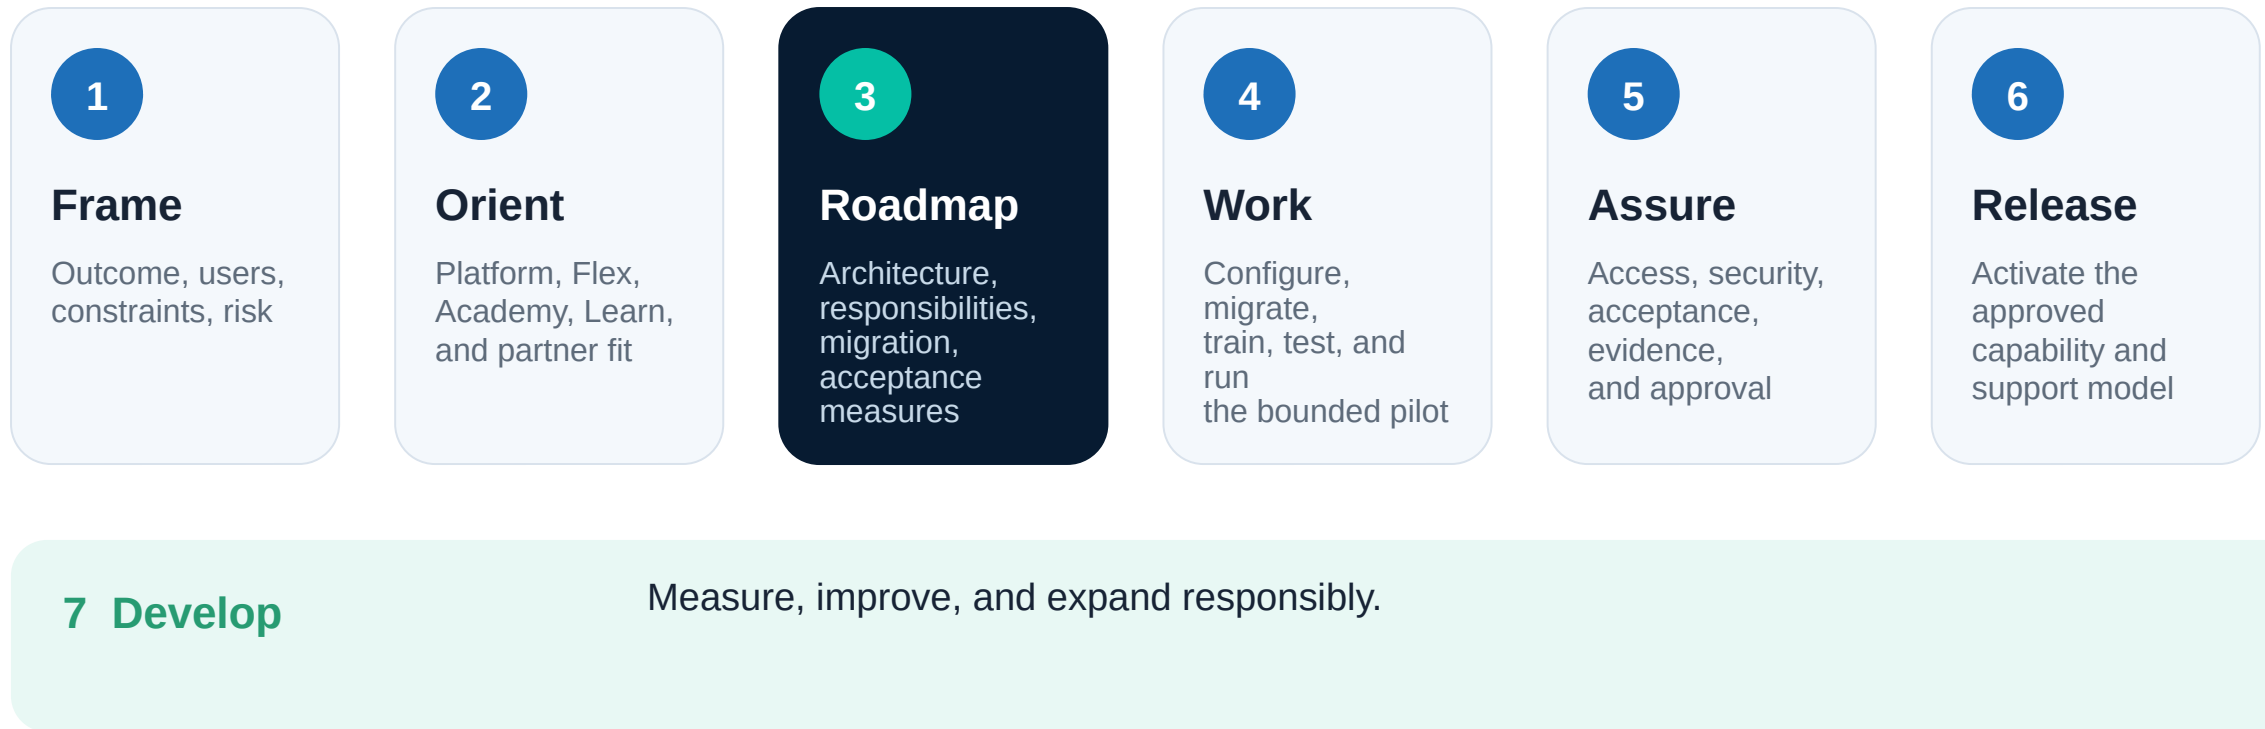

Modernize existing systems without losing control

Use configured workflows where they fit; build or integrate what is distinctive to the institution.

Use FORWARD from intent to responsible development

A seven-stage method connects institutional outcomes to approved release and accountable development.

A more connected institution

One operating context can strengthen continuity across the learner journey while keeping delivery, security, and accountability connected.

- 01 **Connected learner records**
- 02 **Coordinated academic delivery**
- 03 **Role-aware stakeholder access**
- 04 **Actionable operational insight**
- 05 **Governed innovation and integration**

Discuss an institutional pilot
