## Governed Digital Systems Platform

**Build**

**Govern**

**Guard**

A new way to build and operate digital systems

Organizations today struggle with fragmented tools for development, security, compliance, and collaboration. Batoi replaces this fragmentation with a single governed platform.

### What Batoi Enables

- Build applications with governance embedded
- Maintain a continuous compliance posture
- Secure software supply chains
- Govern AI systems responsibly
- Produce audit-ready evidence automatically

### Why Now

Global regulatory pressure is accelerating:

- EU AI Act (2026)
- CMMC 2.0 (US)
- ISO 42001 (AI governance)
- DPDP Act and CERT-In audits (India)

Governance is no longer optional

Built into the system

Captured in audit trails

Enforced through policy

**The Batoi Approach - Governance**

Linked across all workflows

# Built Over a Decade of Systems Engineering

Founded in 2010 by Dr. Ashwini Kumar Rath

- ✔ Enterprise platform engineering
- ✔ Cloud and DevSecOps adoption
- ✔ Modular architecture and RAD framework
- ✔ Transition to governance-first systems

## Today:

Operating across India, USA, and UK

## Where You Start

- ▶ Enterprise → Govern
