Today's Security and Compliance Challenges

Today, businesses face unprecedented challenges in protecting their data and adhering to an ever-evolving regulatory environment.

Escalating Cyber Threats

With cyber-attacks increasing by 50% year over year, businesses are under constant threat, emphasizing the need for advanced security measures to protect critical data assets. (Source: Check Point Research, 2021)

Rising Cost of Data Breaches

The average cost of a data breach has soared to \$4.24 million per incident, marking the highest average cost in the 17-year history of the report. It underlines the financial impact of inadequate security practices. (Source: IBM, 2021)

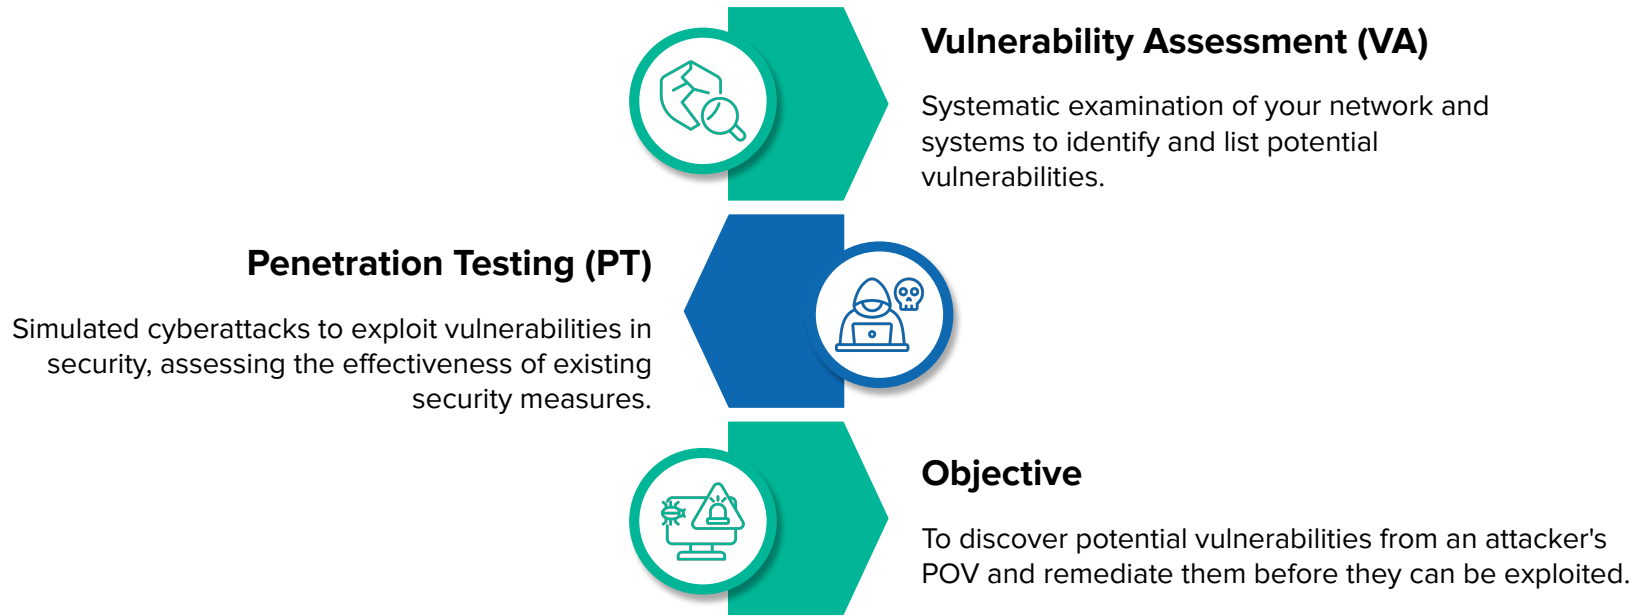

Complex Regulatory Environment

Over 200 updates to regulatory information daily across global jurisdictions challenge businesses to stay compliant, highlighting the complexity of the regulatory environment.

Understanding VAPT - A Comprehensive Approach

VAPT provides a complete picture of your organization's security posture, allowing us to address vulnerabilities proactively.

Why Choose Batoi VAPT Services?

Our service not only identifies and tests but also partners with you for continuous security enhancement, leveraging our proprietary **Batoi Telemetry** technology for deeper insights and improved response times.

Tailored Security

Services that address your business's unique challenges and security requirements.

Actionable Insights

Batoi Telemetry insights enhance detailed reports with prioritized vulnerability findings and practical recommendations for immediate and long-term security strategies.

Expert Team

Our cybersecurity experts deliver thorough assessments and real-world attack simulations using cutting-edge tools.

Continuous Improvement

Our engagement doesn't end with the test—receive ongoing support and proactive monitoring to ensure your defenses evolve with the threat landscape.

Our VAPT Methodology

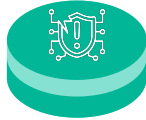

Our systematic approach ensures every stone is turned on, from initial assessment to post-engagement support, with **Batoi Telemetry** providing continuous data-driven insights throughout the process.

[Check the Supplement for the scanning parameters commonly used in the VAPT process.](#)

Phase 1 Planning & Scope

In collaboration with client stakeholders, define the scope of the assessment, objectives, and timelines. Integrate Batoi Telemetry to gather initial telemetry data to tailor the VAPT process better.

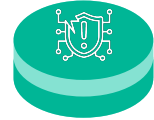

Phase 2 Vulnerability Assessment

Utilize automated tools and manual techniques to identify vulnerabilities across networks, systems, and applications, with Batoi Telemetry enhancing real-time data collection and analysis.

Phase 3 Penetration Testing

Execute controlled attacks to exploit identified vulnerabilities, assess the impact, and document the exploitability. Batoi Telemetry assists in the real-time monitoring of these tests to provide immediate data

Phase 4 Reporting & Feedback

Provide comprehensive reports detailing vulnerabilities, exploits, and corrective actions. Batoi Telemetry data supports these findings with precise metrics and trends observed during testing.

Follow-Up

Continuous monitoring and periodic re-assessment to manage new risks, supported by Batoi Telemetry for ongoing threat detection and system health monitoring.

VAPT Service Packages

Each package is structured to meet different levels of need, budget, and depth of service required.

Basic Package

- Network and port scanning
- Basic vulnerability scanning (automated)
- Web application scanning (basic)
- Report with vulnerability summary and recommended actions
- One re-scan post remediation

Professional Package

- All services in the Basic package
- Comprehensive manual and automated vulnerability and web application scanning
- Wireless security testing
- Password strength testing
- Detailed report with prioritized findings and remediation guidance
- Penetration testing (limited scope)
- Two re-scans post remediation
- Presentation of findings to key stakeholders

Enterprise Package

- All services in the Professional package
- Full-scope penetration testing, including social engineering tests
- Network traffic analysis
- Security patch verification
- Configuration audits
- Encryption assessment
- Quarterly vulnerability scans
- Monthly security status calls
- On-demand consultation for security issues
- Customized security training for staff

Enhanced Enterprise Package: VAPT + Continuous Monitoring

Integrating ongoing monitoring services with periodic intensive assessments like VAPT is effective for clients interested in comprehensive security oversight.

All features of the Enterprise VAPT package.

Regular Vulnerability Scans

Automated scans are conducted monthly to identify and address vulnerabilities more frequently.

Quarterly Security Reviews

Regular meetings to review security posture, discuss any incidents, and refine security strategies.

Continuous Security Monitoring

Real-time network traffic monitoring, alerts on suspicious activities, and immediate incident response.

Security Advisory Services

Ongoing advice and updates on security best practices, emerging threats, and compliance requirements.

Success Stories in Enhancing Cyber Resilience

Real-world examples of how Batoi VAPT has protected businesses and fostered customer trust.

Retail E-commerce Giant

Identified and mitigated critical vulnerabilities in their payment gateway integration, enhancing transaction security.

Healthcare Provider

Secured patient data by addressing severe compliance lapses and security vulnerabilities in their data storage systems.

Manufacturing Firm

Strengthened perimeter defenses following a simulated attack that revealed potential entry points in their network.

"The solution eliminated lots of efforts to meet the project goals"
