

# Batoi's ISO Certification with BSI - A New Journey

**Bhubaneswar, India – August 17, 2022**—Batoi, a leading software development automation company, is delighted to announce that it has successfully acquired the ISO 9001:2015 and ISO/IEC 27001:2013 certifications from the British Standard Institute (BSI) after completing the stringent audit and ongoing evaluation process. This accreditation implies that Batoi has adopted a quality management system that considers all processes designed to meet international quality standards and demonstrates its commitment to the highest information security management standards.

## What Is the International Organization of Standardization (ISO)

The ISO is a family of standards that helps businesses secure and manage their information assets. It specifies the standards for an Information Security Management System (ISMS), a systematic approach to managing sensitive information efficiently. Applying a risk management process, ISMS involves enterprises' people, processes, and IT systems and protects their information assets.

Standardization aims to streamline daily business processes, maintain product uniformity and safety, and promote worldwide collaboration and compatibility. Additionally, these international standards create specifications for products, services, systems, and procedures to measure their level of excellence. A business can only be considered genuinely standardized if it has obtained ISO certification.

ISO certification can help:

- Enhance and streamline business operations,
- Open new opportunities and satisfy customers,
- Build a more resilient and sustainable business with better quality management and
- Protect resources, improve operational performance, and increase profits.

## Why British Standard Institute (BSI)

BSI (British Standards Institute) is a UK-based non-profit organization offering standardization, systems assessment, product certification, training, and advisory services. BSI accreditation signifies that a company has been assessed against internationally recognized standards and operates with high-quality products and services. This accreditation mitigates customer risks and assures that the company was independently evaluated for competence and performance capacity.

Counting on BSI can yield:

- Managing social, environmental, and financial risks.

- Operational boost and cost reduction.
- Protecting the brand's reputation and unnecessary damage
- Eliminating trading barriers and bringing clarity to the marketplace.

“The process continued for almost three months. We matched the quality and security standards, including initial assessments, audit of quality management systems, and clearance of non-conformances as demanded by BSI. We have also built documentation for an integrated management system (IMS) for seamless deployment and simplified processes. We are in the phase of streamlining process management and tracking”, said Mr. Ashwini Rath, CEO of Batoi.

## About Batoi

Batoi is a software development automation company. The Batoi RAD Platform revolutionizes software engineering by automating development, deployment, telemetry, and workflow management processes. Our comprehensive managed services, enhanced by AI, cover application development, DevSecOps, VAPT, cloud cost optimization, scaling, migration, and security compliance. We empower businesses with robust digital transformation solutions, web portal development, and e-commerce implementation, ensuring seamless integration and enhanced performance.
