Advantages with BATOI

- ✓ **Usability:** All software systems are accessible with single login. Different functions are made available so that tasks can be achieved with least number of clicks. The user Dashboard is equipped with requisite information that guides to understand the available data in better way and to perform tasks as per their priorities.
- ✓ **Quick Configurability:** Different functions can be configured including the application settings, form fields and point of access quickly and through the graphical user interface. The user access privileges are granularly managed through role-based access control and can be modified from the Administration Panel.
- ✓ **Adaptability:** The customer can adopt one of the three models for deployment (Figure: 2) based on the degree of control and statutory requirements.
- ✓ **Reduction of Upfront Cost:** BATOI Cloud provides high-end tools to create and customize the software system thus reducing effort and time to deploy the software.
